Glycolipids

Description

- **SphinGOMAP** http://sphingolab.biology.gatech.edu/ SphinGOMAP is an evolving pathway map for sphingolipid biosynthesis that includes many of the known sphingolipids and glycosphingolipids arranged according to their biosynthetic origin(s
- **CHARMM Gui** http://www.charmm-gui.org/?doc=input/glycolipid. Glycolipid Modeler simplifies the generation of various glycolipid structure and PSF files from a set of predefined glycolipids as well as a user-defined glycolipid sequence.
- **LIPID MAPS structure database (LMSD)** http://www.lipidmaps.org/data/structure/ The LIPID MAPS Structure Database (LMSD) is a relational database encompassing structures and annotations of biologically relevant lipids. glycosphingolipids, saccharolipids
