

Glycolipids

Description

- **SphinGOMAP** <http://sphingolab.biology.gatech.edu/> SphinGOMAP is an evolving pathway map for sphingolipid biosynthesis that includes many of the known sphingolipids and glycosphingolipids arranged according to their biosynthetic origin(s)
- **CHARMM Gui** <http://www.charmm-gui.org/?doc=input/glycolipid>. Glycolipid Modeler simplifies the generation of various glycolipid structure and PSF files from a set of predefined glycolipids as well as a user-defined glycolipid sequence.
- **LIPID MAPS structure database (LMSD)** <http://www.lipidmaps.org/data/structure/> The LIPID MAPS Structure Database (LMSD) is a relational database encompassing structures and annotations of biologically relevant lipids. glycosphingolipids, saccharolipids
