
Structural Glycoscience Grenoble 2018: Program & Documents

Description

From Monosaccharides to Polysaccharides, from Structures to 3D Databases.

> http://glycopedia.eu/IMG/pdf/grenoble2018_perez.pdf. *Serge Perez*

Docking and Molecular Modelling. >http://glycopedia.eu/IMG/pdf/grenoble2018_fadda.pdf]. *Elisa Fadda*

Protein-sugar Interaction Isothermal Titration Calorimetry. *Bruce Turnbull*

Application of Neutron Diffraction to Glycoscience.

Protein-sugar complexes by X-ray crystallography. >

http://glycopedia.eu/IMG/pdf/grenoble2018_varrot.pdf] *Annabelle Varrot*

Solution studies: Analytical ultracentrifugation, SAXS, SANS, MALS. >

<http://glycopedia.eu/IMG/pdf/grenoble2018-ebel.pdf>]. *Christine Ebel*

Protein-Sugar Interaction by Surface Plasmon Resonance. *Jean-Baptiste Reiser*

NMR of Oligosaccharide and Protein Oligosaccharide Complex. >

http://glycopedia.eu/IMG/pdf/grenoble2018_molinaro.pdf]. *Antonio Molinaro*

Electron microscopy: new opportunities. >http://glycopedia.eu/IMG/pdf/grenoble2018_malet.pdf]

Hélène Malet

C-type lectins. *Franck Fieschi*

Galectins. *Ulf Nilsson*
